Professional Summary

QA Automation Engineer with 10+ years of experience in Functional and Automation testing, including API and end-to-end testing. Strong hands-on expertise in C#, Selenium, and Agile delivery environments. Proven ability to work independently and collaborate across teams. I am a certified ISTQB tester with domain experience in Insurance, E-learning, and Healthcare. Passionate about delivering high-quality software solutions through modern testing practices and continuous improvement.

Core Skills & Technologies

- **Automation Tools:** Selenium, SpecFlow, C#, BDD, Playwright
- **Languages:** C#, Typescript(Basic), JavaScript(Basic)
- **Test Types:** Functional, Regression, Performance (Basic), Automation testing, End-to-End, API Testing
- **Frameworks:** BDD, CI/CD Pipelines (Git), Agile/Scrum, NUnit
- **Tools:** Postman, JIRA, HP QC, Azure DevOps
- **Domains:** Group Health Insurance, Life Insurance, P&C, Claims, E-Learning

---

Certifications

- ISTQB – Foundation Level
- Business Analysis Certification (IIBA – ECBA)

Professional Experience

Senior Test Analyst | NEC Software Solutions

Moorepay ***(Payroll & HR Solutions)-*** *Mar 2021 – Present*

Tools Used: Selenium, SpecFlow, Git, CI/CD pipeline (Azure DevOps), JIRA, Playwright (Basic)

- Contributed to creating robust automated test suites using **C#** and **Selenium, NUnit** to validate end-to-end workflows and regressions across releases.
- Authored BDD test cases using **SpecFlow** for improved traceability with business requirements.
- Performed **API testing** using **Postman**.
- Executed test suites with **CI/CD pipelines** via **Git** to support continuous testing and faster feedback loops.
- Used **Azure DevOps** to manage test cycles, track bugs, and report QA metrics.

- Hands-on on **Playwright** for UI automation to validate end-to-end user workflows across different bowsers- Chromium, Firefox.

Outcome:

- Reduced manual regression cycle by over **60%** through automation.
- Helped decrease critical production issues by **30%** by ensuring test coverage across APIs and UI.

Senior Test Analyst |NEC Software Solutions –
Project: British Pharmacological Society ***(Healthcare & Education)****- Aug 2018 – Feb 2021*

- Understand requirements, user stories, and acceptance criteria and collaborated with stakeholders
- Define test scope (what to test / what not to test)
- Design, review, and execute manual test cases
- Track, validate, and manage defects through closure
- Plan and allocate testing tasks to team members

Outcome:

- Improved test coverage and reduced production defects by early identification of risks and enforcing smoke and regression testing before releases.

Associate Consultant |Capgemini –
Project-Chubb Insurance (Life, Group Health, P&C, Claims) Oct *2015 – Aug 2018*
Tools Used: HP QC, Excel, JIRA, SQL

- Managed and executed test cases using **HP QC ALM**.
- Logged, tracked, and verified defects using **JIRA** during system and UAT phases.
- Authored test cases, test plans, and executed test cycles using **HP QC** for Duck creek Policy setup and Claim testing
- Validated data integrity and backend logic using **SQL** queries on financial datasets.

Outcome:

- Detected and resolved key data migration bugs, new customer onboarding workflows improving onboarding accuracy for insurance agents.

Key Achievements

- **'Pat on the Back'** Award – NEC (Rave Technologies), Q2-2019
  - Awarded for going beyond project responsibilities by creating reusable automation scripts that accelerated testing cycles.
- **'Star of the Quarter'** – Capgemini, Q1-2017
  - Recognized for exemplary contributions to quality assurance in a major insurance release under tight deadlines.

- **'Positive Influence Award'** – Capgemini, 2017
  - Honored for mentoring junior QA members and fostering a collaborative and learning-focused team environment.

Educational Qualifications

Bachelor of Computer Applications (BCA) 2014 -74%

Higher Secondary Certificate (HSC) 2011 – 72%

Secondary School Certificate (SSC) 2009 - 85%
